

FLORIDA ALICE LEGISLATIVE PRIORITIES

46% of Florida households struggle to afford the basic necessities of housing, child care, food, technology, health care and transportation.

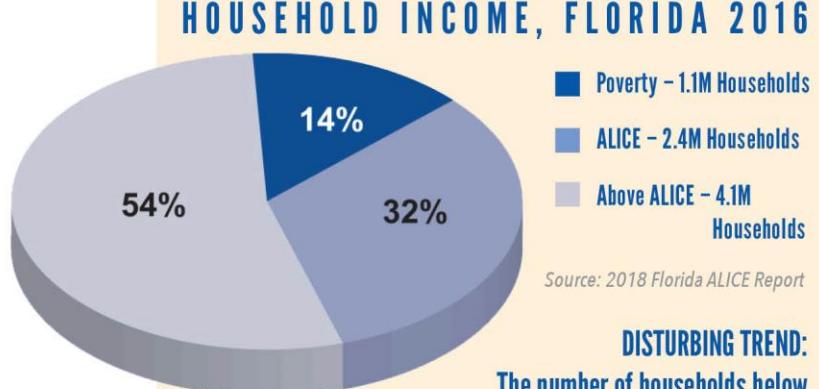

In 2014, the United Way's groundbreaking **Florida ALICE Report** put a disturbing new spotlight on workers who collectively form the backbone of Florida's economy. **ALICE** is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed. "Employed" is the critical word. **ALICE** represents households that have incomes above the Federal Poverty Limit, but consistently struggle to afford basic needs, such as housing, food, healthcare, childcare, and transportation.

Of Florida's 7.6 million households, 14% (1.1 million) lived in poverty in 2016 and another 32% (2.4 million) were **ALICE**. Combined, 46% (3.5 million) of Florida households had income insufficient to consistently afford their basic needs, an increase of 10% since 2010.

ALICE families live on the brink of financial disaster every day, just one car breakdown, medical emergency, or other unanticipated expense away from falling into poverty.

Between 2010 and 2016 basic household expenses increased by 20% for a Florida family of four while median wages increased 13%.

DISTURBING TREND:
The number of households below the ALICE Threshold increased by 10% from 2010 to 2016.

ALICE workers are essential to the fabric of our society and our economy. **ALICE** works in jobs that are integral to our communities, from childcare educators and home health aides to mechanics and hospitality workers; workers we rely on every day. The future success of our communities is directly tied to the financial stability of **ALICE** households. When **ALICE** suffers and is forced to make difficult choices, we all face serious consequences.

The "ALICE Threshold" is the conservative cost, calculated statewide and by county, of the six basic necessities for a household to survive: housing, transportation, childcare, health care, food, and technology.

The 2020 Florida United Ways Consensus Legislative Agenda provides policy makers opportunities to help **ALICE** become more financially stable and self-sufficient; opportunities that will improve the quality of life and the economy for all of us in the Sunshine State.

of all Florida families with children live below the ALICE threshold

62% of Black households and 58% of Hispanic households live below the ALICE threshold

of single female-headed households live below the ALICE threshold

of Florida's counties - 32 counties - have 50% or more of their populations living below the ALICE Threshold

FLORIDA ALICE LEGISLATIVE PRIORITIES
